Red eye - NHS
Antihistamine eye drops contain medications designed to treat symptoms of eye allergy (allergic conjunctivitis)—chief among them itching, but also redness, soreness, stinging, and/or swelling—triggered by the immune system response to an allergen. Once available only by prescription, antihistamine eye drops can now be purchased over the counter.

Top Treatments for Red Eyes - Verywell Health
A red eye is an eye that appears red due to illness or injury. It is usually injection and prominence of the superficial blood vessels of the conjunctiva, which may be caused by disorders of these or adjacent structures. Conjunctivitis and subconjunctival hemorrhage are two of the less serious but more common causes. Management includes assessing whether emergency action is needed, or whether treatment can be accomplished without additional resources. Slit lamp examination is invaluable in diagn
