You can't eliminate corrosion, but you can slow its onset and progress: For the typical aircraft owner/operator and maintainer that all comes under the umbrella of a corrosion prevention and control (CPC) program. "Proper aircraft cleaning is one of the most important things that can be done in corrosion prevention because it removes built-up from airborne contaminants, pollutants, salts from runway de-icing and other chemicals that come in contact with the aircraft," explained David ...

## Download File PDF Aircraft Cleaning And Corrosion Control Faa

In general, corrosion of aluminum can be treated more effectively in place than by removing structural parts from the aircraft. Treatment includes the mechanical removal of the corrosion products, the inhibition of residual materials by chemical means, and the restoration of permanent surface coating.

### **AC 43-4B - Corrosion Control for Aircraft**

Aircraft cleaning standards are regulatory requirements that civil aviation authorities (worldwide) impose on the airline operators to ensure the minimum level of cleanliness onboard. The purpose of cleaning standards in
