A runtime calibration is required at initial start-up, when additional batteries are added, old batteries are replaced or if the estimated runtime is found to be inaccurate. Do not use old batteries (two or more years old), and new batteries together. Refer to the Perform a UPS Runtime Calibration section in this manual for calibration criteria.

Installation and Operation

If you do a manual calibration, you won't need to wait for the UPS to say 100% vs.

Access Free Apc Ups Calibration Manual

99% but you'll need to sit and watch the UPS and make sure you reapply AC power to it when its complete. The software command will discharge the UPS down to 10-20% and charge itself back up with out you sitting there.
