Determined to overcome a difficult past, Erica Hathaway learns early on to make it on her own. Days after her college graduation, she finds herself face to face with a panel of investors who will make or break her fledgling start-up website. The only thing she didn't prepare for was going weak in the knees over an arrogant and gorgeous investor who seems determined to derail her plans. Billionaire and rumoured hacker Blake Landon has already made his fortune in software, and he's used to getting what he wants. Captivated by Erica's drive and unassuming beauty, he's wanted nothing more than to possess her since she stepped into his boardroom. Determined to win her over, he breaks down her defences and fights for her trust, even if it means sacrificing a level of control he's grown accustomed to. But when Blake uncovers a dark secret from Erica's past, he threatens not just her trust, but the life she's fought so hard to create. The perfect new addiction for fans of Fifty Shades of Grey and Sylvia Day's Bared To You series.

Before the voyage of Columbus in 1492, the Atlantic Ocean stood as a barrier to contact between the people (and their ideas and institutions), plants, animals, and microbes of Eurasia and Africa on the one hand and the Americas on the other. Following Columbus's voyage, the Atlantic turned into a conduit for transferring these things among the four continents bordering the ocean in ways that affected people living on each of them. The appearance of *The Atlantic World* marks an important achievement, for it stands out as the first successful attempt to combine the many strains of Atlantic history into a comprehensive, thoughtful narrative. At the core of this ground-breaking and eloquently written survey lies a consideration of the relationships among people living in Europe, Africa, and the Americas, with a focus on how these relationships played important roles—often the most important roles—in how the histories of the people involved unfolded. The ways of life of millions of people changed, sometimes for the better but often for the worse, because of their relationship to the larger Atlantic world. And unlike existing texts dealing with one or another aspect of Atlantic history, *The Atlantic World* does not subjugate the history of Africa and South America to those of the “British Atlantic” or Europe. With historians and other scholars beginning to reconceptualize the Atlantic World as a dynamic zone of exchange in which people, commodities, and ideas circulated from the mid-fifteenth century until the dawn of the twentieth century, the

interconnections between people along the Atlantic rim create a coherent region, one in which events in one corner inevitably altered the course of history in another. As this book testifies, Atlantic history, properly understood, is history without borders—in which national narratives take backstage to the larger examination of interdependence and cultural transmission. Conceived of and produced by a team of distinguished authors with countless hours of teaching experience at the college level, this thoughtfully organized, beautifully written, and lavishly illustrated book will set the standard for all future surveys intended as a core text for the new and rapidly growing courses in Atlantic History.

Murder, He Wrote... .. And he wrote the true story. Investigative and military reporter Robert Wilcox unravels the mystery surrounding the death of one of history's preeminent war heroes: George S. Patton. Wilcox cries foul play and reveals the shocking truth behind Old Blood and Guts' untimely demise in Target: Patton—the Plot to Assassinate General George S. Patton. Conflicting testimony, disappearing witnesses, missing official reports, a suspicious Stalin, and a lack of autopsy comprise the greatest unsolved mystery of World War II. Find out "whodunit" in this thrilling account of America's most famous general.

The properties along the American Coast are one of the most sought after properties in the United States. People are swarming to buy or build on beach property on the Atlantic Gulf and Pacific Coast. The increase in population and building has created many problems. Beaches are getting smaller and building density is increasing. This increasing density increases the changes for large developed areas to be in the path of a hurricane and the larger the developed area, the greater the potential for property lose and deaths.Both coastal development will continue and hurricanes be spawned and make landfall. If we are to minimize property lose along our coast, we must construct buildings that will resist the water and wind forces in hurricanes.The purpose of this manual is to provide design and construction, details and technique for improving coastal construction.
