"Diagnosis in Chinese Medicine is an indispensable tool for the interpretation of symptoms and signs. It is the first text that helps the practitioner to understand the significance of symptoms and signs making diagnosis and treatment strategies easier and more logical."

Diagnosis in Chinese Medicine: A Comprehensive Guide ...

Diagnosis in traditional Chinese medicine may appear to be simply a grouping of symptoms, but the elegance of Chinese medicine is that a diagnosis automatically indicates a treatment strategy. For example, a woman experiencing menopause may have hot flashes, night sweats, thirst, and irritability; this group of symptoms leads to a diagnosis of kidney yin deficiency with heat.

Easily accessible and heavily illustrated, this complete guide to diagnosis in Chinese Medicine places an emphasis on "real world" issues. Focusing on clear interpretations of signs and symptoms, it addresses the practice beyond the theory and leads readers through both basic and sophisticated levels of diagnostic interpretation. Since Chinese medicine diagnosis relies on a subtle appraisal of a patient's disharmony, many factors beyond traditional Western symptoms are considered, including a patient's voice, the absence of thirst, feeling hot or cold, the patient's smell, tone of voice, and glitter of eyes. This practical resource helps readers carefully interpret a range of nuances. Provides a clinical understanding of Traditional Chinese Medicine Offers an unparalleled depth of information that is meticulously cross-referenced Includes all the signs and symptoms, however subtle, that a modern patient may present in the clinic Provides clinical experience and understanding from a leader in the field of Chinese medicine Clearly outlines the decision-making options in key situations to help readers through the most challenging topics Logically organized so readers can quickly find the information they need in clinical situations

Acting as a bridge between the basic theory of Chinese medicine (CM) and various clinical subjects, Diagnostics in Chinese Medicine can be regarded as a core subject in understanding the concept of CM. Based on the national textbooks of CM in China, Diagnostics in Chinese Medicine is written combined with the National Standard and Quality Course given by Professor Chen Jiaxu at Beijing University of CM. According to Professor Chen's long-standing high academic profile and clinical practice, figures and tables are presented clearly to intensify understanding and comprehension. We are sorry that the DVD content are not included.

This book is organized around the 'four pillars' of TCM diagnosis: inspection, inquiry, listening and smelling, and palpation. In this text, each aspect is

explained in a clear and systematic manner, with generous use of tables and illustrations. This is followed by a series of review questions for deeper understanding. A comprehensive self-examination consisting of 200 multiple choice questions, with a separate key to the answers, tests the reader's understanding of the important points of each aspect of diagnosis. These questions, many of which are presented in case study format, will help students prepare for the board exams.

This translation of the original Chinese text provides a guide to clinical examination and differential diagnosis in traditional Chinese medicine. It examines the diagnostic method used in traditional Chinese medicine and relates it to TCM syndromes. Colour plates illuminate key diagnostic signs.

The principles and practice of diagnostics are key to administering effective treatment in traditional Chinese medicine. The ability to recognise and diagnose symptoms and complaints correctly is fundamental to deciding on appropriate remedies, and this book provides a comprehensive introduction to all the principles that students and practitioners need to know. The authors outline the key methods used in diagnosis, and describe the eight basic categories of ailment and disease: yin and yang, exterior and interior, cold and heat, and deficiency and excess. They provide detailed instructions on how to identify and rebalance the relative strengths of pathogens and Qi in the body, and how to differentiate between syndromes that might look the same, using traditional Chinese medicine methods. The book concludes with useful forms for completion in taking a diagnosis. Combining practical instruction with detailed theory, this authoritative textbook, compiled by the China Beijing International Acupuncture Training Center (CBIATC), under the editorial direction of leading Chinese clinicians Zhu Bing and Wang Hongcai, is an excellent reference for students and practitioners at all levels.

A study of the earliest extensive account of Chinese pulse diagnosis, focusing on a biography of Chunyu Yi.

This book is an introduction to diagnosis and treatment through looking at the tongue. Modern tongue diagnostics combines traditional Chinese medical tongue diagnostics with bio-holographic theory, using the holographic reflections on the tongue to diagnose disease, thereby improving the accuracy of the diagnosis in terms of what and where the illness is. This book introduces in detail the theory of the tongue midline as well as the positions where various organs are reflected on the tongue, as well as the appearances of the tongue corresponding to various pathological changes in these organs. This book is the first to publicize the author's many patented tongue diagnosis images, such as the panoramic hologram image which for the first time revealed the position and posture of the human body as it appears holographically on the tongue, the head and neck gland distribution image, the head and facial features map, and more. The author, aided by the experiences of previous scholars, discovered the position and posture of the human body as it appears holographically on the tongue. The holographic state of the human body as it appears on the tongue is in a prone position, that is, the head area is reflected at the tip of the tongue with the face facing forward, the legs and buttocks are reflected at the back of the tongue, and the four limbs are reflected in a bent position on the two sides of the tongue. The author has discovered how the glands of the head and neck are mapped on the tongue, especially the map of the thyroid gland on the tongue, refuting the common belief about how the thyroid gland is reflected on the tongue. Contrary to common belief, the thyroid gland is not reflected on the two sides of the cervical vertebrae reflection area on the tongue, but instead is on the two sides of the upper jiao area (the upper third of the tongue). The author has determined the areas of the tongue where various organs are reflected, as well as the changes in tongue appearance corresponding to the diseases in these organs. For example, heart disease is often reflected on the tongue as cracks or sunken areas in the heart reflection area of the tongue. In many years of clinical experience using tongue diagnostics, I have attempted to combine tongue diagnostics with herbal medicine and acupuncture, and have attained significant improvements in clinical efficacy, and have created a shortcut for accelerating diagnosis and improving efficacy. This book will mainly introduce diagnosis and differentiation based on the tongue with some case study.

A favorite for first year acupuncture and TCM students because it covers the essential knowledge of the channels and collaterals and the characteristics of the channel system, providing descriptives that include the key points, pathway, associated organs and points, physiology, pathology, clinical applications, and divergent, teninomuscular, and collateral channels.
