One of the most challenging environmental threats to the ten countries of the Association of Southeast Asian Nations (ASEAN) has been the haze, the sickening and deadly cloud of smoky pollution caused by widespread burning of land and forests in Indonesia. This book examines both the threat and response to it by analysing environmental cooperation in Southeast Asia from an international regime perspective.

Environmental Cooperation in Southeast Asia (Routledge ...

Tracing the development of regional cooperation on the haze and evaluating the effectiveness of the cooperation, the author argues that the haze crisis, combined with the economic crisis of 1997, has profoundly challenged the ASEAN modus operandi, and resulted in ASEAN's efforts to establish an environmental regime to cope with environmental challenges.

Environmental Cooperation in Southeast Asia: ASEAN's ...

Southeast Asia has a longer history of subregional environmental cooperation than other subregions in Asia and the Pacific. This has a great deal to do with its geopolitical picture. In the1960s, the subregion was divided by ideological conflict and war.

Environmental Cooperation in Southeast Asia (draft)

While it is often said that ASEAN's long-standing policy of non-interference acts as an impediment to regional cooperation on transboundary environmental issues, and that therefore ASEAN is ill-equipped to control or mitigate ecological degradation within its political space (Jones, 2009; Aggarwal, & Chow, 2010; Molthof, 2012; The Economist, 2015; Collins, 2016; Nguyen, 2016), in this essay we argue that the institutional regime codified in the ASEAN Charter is in fact well-suited to ...

The ASEAN Way Out? Toward Cooperative Environmental ...

Environmental degradation in Southeast Asia has been implicated in what some describe as a failure of regional cooperation and a crisis of regional identity and credibility within ASEAN.

Environmental Cooperation in Southeast Asia: ASEAN's ...

ASEAN regionalism and the politics of the environment The Association of Southeast Asian Nations (ASEAN) emerged out of the regional contentions and security concerns among ASEAN leaders. These tensions are partly a legacy of colonization and de-colonization that had left the new nations with territorial disputes and struggles for international recognition, security and sovereignty.

(PDF) Regional Cooperation and Environmental Issues in ...

Southeast Asia is a region where regional cooperation for the protection of the marine environment faces some unique challenges. This paper explores the current regional cooperation landscape in this area and then draws on other regions (Arctic, Caribbean, Mediterranean and the Baltic) experience to seek out inspiration and possible best practices for Southeast Asia.

Regional Cooperation and Marine Environmental Protection ...

The 1st ASEAN Summit was held in February 1976 in Bali, Indonesia. At this summit, ASEAN expressed its readiness to "develop fruitful relations" and mutually beneficial co-operation with other countries of the region. The ASEAN leaders signed the Treaty of Amity and Cooperation in Southeast Asia.The 2nd ASEAN summit held in Kuala Lumpur, Malaysia in August 1977 was the occasion for the first ...

ASEAN Summit - Wikipedia

In principle, the political arena consists of four main actors: local environmental groups, international organisations, the Association of Southeast Asian Nations (ASEAN), and nation states. Considering the transnational and multilateral impact of environmental issues, ASEAN is the sole institution in the region that can provide the necessary framework to address issues on a multilateral level.

Environmental Issues in Southeast Asia - Fair Observer

Southeast Asia: Patterns of security cooperation 2 ASPI Strategy Executive summary Australia will face a more complex strategic environment in Southeast Asia over the next five years. That environment will be characterised by an overlay of mutually supporting and competing security patterns in which Southeast Asian and external powers will

Southeast Asia: Patterns of Security Cooperation

The Asia Foundation's recently released report ASEAN as the Architect for Regional Development Cooperation argues that countries in the region have the interest and capacity to more directly shape regional development in Southeast Asia, but they currently lack the mechanism to do it. ASEAN has traditionally provided the architecture for collective engagement with major powers outside the region on political and security issues.

One of the most challenging environmental threats to the ten countries of the Association of Southeast Asian Nations (ASEAN) has been the haze, the sickening and deadly cloud of smoky pollution caused by widespread burning of land and forests in Indonesia. This book examines both the threat and response to it by analysing environmental cooperation in Southeast Asia from an international regime perspective. Tracing the development of regional cooperation on the haze and evaluating the effectiveness of the cooperation, the author argues that the haze crisis, combined with the economic crisis of 1997, has profoundly challenged the ASEAN modus operandi, and resulted in ASEAN's efforts to establish an environmental regime to cope with environmental challenges. The emerging ASEAN haze regime is a unique case study of a regional environmental institution in multi-levelled global environmental governance. Based on in-depth original research, this case study is integrated into international relations, political science, and comparative political analysis literatures and contributes to a better understanding of processes within the regional organisation.

In the context of massive environmental problems in Southeast Asia, the countries in the region have decided – at least in some instances – to create regimes to solve these problems jointly. This empirical observation is surprising, given the Southeast Asian countries' general reluctance to regional cooperation, the governance and budgetary constraints that are typical for developing countries and the huge heterogeneity of the involved countries in terms of environmental vulnerability, economic capacity and hegemonic power. This book analyzes the creation and effectiveness of two environmental regimes, one on transboundary haze pollution and a second on resource management of the Mekong. It will be shown that regime creation is extremely problematic and strategies to overcome conflicting actor constellations are mostly lacking.

Annotation As the twenty-first century commences, the countries of Pacific Asia are grappling with the impact of regional development, industry, and growth on their increasingly acute environmental problems. International Environmental Cooperation: Politics and Diplomacy in Pacific Asia brings together innovative and insightful studies of international environmental politics in this increasingly critical part of the world. The first section of the book examines many of the issues and actors impacting international environmental cooperation, highlighting important themes such as cooperation between developed and developing countries, international justice, and regional environmental security. This section also illustrates key features of specific multilateral environmental agreements and the competing interests of important national bodies, international organizations, multinational corporations, and nongovernmental entities. The second section focuses on environmental diplomacy and regime-building in Pacific Asia, examining issues such as acid rain, nuclear waste, deforestation, and conflict over regional seas. Contributors from Asia, Europe, and North America bring an international perspective to questions of environmental cooperation. International Environmental Cooperation provides policymakers, citizens, scholars and students with essential information for understanding and addressing some of the world's most significant environmental problems.

ASEAN Environmental Law, Policy and Governance: Selected Documents, in two volumes, contains a judicious compilation of relevant ASEAN environmental instruments. These documents deal with ASEAN's progressive development of environmental law, policy and governance. Volume I consists of two parts. Part I OCo OC Setting the Stage for ASEAN Environmental Cooperation, Harmonization and IntegrationOCO OCo contains documents which are directly or indirectly related to various aspects of the environment, including their potential impact. The scope of environmental law is wide-ranging and its interrelationship straddles the three mutually reinforcing ASEAN pillars, namely, security, economic and socio-cultural. Part II deals with the OC General Legal Frameworks on the EnvironmentOCO. It is subdivided into (A) Programmes, Strategies, Plans of Action and Blueprints; and (B) Declarations, Resolutions and Accord. The forthcoming Volume II will deal with key sectoral areas including nature conservation and biodiversity; water resources management; animal and human health; climate change and energy; transboundary pollution; and disaster management and emergency response. The book will be of interest to all ASEAN government officials, diplomats and its peoples; ASEAN dialogue partners; entities associated with ASEAN; comparative environmental lawyers and every ASEAN watcher."

This book presents a comprehensive analysis of the status and progress of China-ASEAN green development and examines the common development issues in China and ASEAN Member States (AMSs). It also explores development trends within the framework of global and regional environmental governance and discusses the approaches towards green development in China and AMSs, offering its own definition of green development and using a "pressure-state-response" (PSR) model to build a framework for assessing green development. The book includes typical policy measures and numerous practices for green development in China and AMSs in the form of tables, figures and boxes. Based on detailed analysis, it argues that the global 2030 Agenda for Sustainable Development brings significant opportunities to China and AMSs, that the ongoing pragmatic cooperation should be further advanced, and that a connection between the Belt and Road Initiative and green ASEAN Community should be established to achieve regional sustainable development. As such it furthers readers' understanding of environment and development and practical policy advice for promoting China-ASEAN cooperation on environment and green development. Intended for decision makers from the government, business sector, and civil societies who are working to boost green development and China-ASEAN cooperation, it is also a valuable resource for government officials, researchers and non-experts interested in creating a balanced relationship between the environment and development.

While the environmental performance of most ASEAN member states is above the world average, ASEAN nations will continue to face growing environmental challenges due to pressures exerted on them such as population growth, urbanization and industrialization. The authors of this book look at how the member states of ASEAN employ law as a means of regional integration within the context of environmental conservation. While the goal of new laws is to implement sustainable development, it continues to be an ongoing adaptive process, since clear and immediate answers to environmental challenges are rarely available. Readers of this book will gain a clear idea of the evolving cooperation for sustainability within ASEAN at regional and global levels, and the areas of focus for the future. The book will be of interest to policy and decision makers, as well as environmental organizations and academics in the field.
