JCR Impact Factor table also includes the Quartile and JIF Percentile for each year. ESI Total Citations provides rank and quartile, in addition to a graph of Total Citations by JCR years.

## **JCR Impact Factor and ESI Total Citations Rank**

Access Journal Citation Reports (JCR) from the Libraries' Databases tab, alphabetical listing or from the Additional Resources tab within the Web of Science database. Step 1. On the Home page the default settings are to search for Journal by Rank, the latest year data and in both Science and Social Science editions. Start typing the full title of the journal in the box and JCR will display titles in their database that match.

The impact factor is beneficial, but when it comes to quality, then the use of the impact factor is not right.

According to the database of the year 2017, the journal citation reports, tracked the impact factor for nearly 12, 298 journals. According to the database, out of the 12, 298 journals, just 239 titles, or 1.9 percent journals that were tracked by the JCR, impact factor of 10 or higher.

## **How can I find the impact factor and rank of a journal?**

The Journal Impact Factor should be used with informed peer review. In the case of academic evaluation for tenure, it is sometimes inappropriate to use the impact of the source journal to estimate the expected frequency of a recently published article. Again, the Journal Impact Factor should be used with informed peer review.

## **How do I find the impact factor and rank for a journal?**

The Journal Impact Factor is defined as all citations to the journal in the current JCR year to items published in the previous two years, divided by the total number of scholarly items (these comprise articles, reviews, and proceedings papers) published in the journal in the previous two years.

Though not a strict mathematical average, the Journal Impact Factor provides a functional approximation of the mean citation rate per citable item.
