This book constitutes the proceedings of the 11th International Conference on Spatial Information Theory, COSIT 2013, held in Scarborough, UK, in September 2013. The 28 papers presented in this book were carefully reviewed and selected from 62 full paper submissions. The following topics are addressed: spatial change, wayfinding and assistance, representing spatial data, handling language data, spatial language and computation, spatial ontology, spatial reasoning and representation.

Throughout the world, teaching is looked at as one of the most respected and noble profession a person could have. A great teacher not only shows the right path that a student should follow but also prepares the human resources for the further development of the nation. Among various exams CTET is the most popular teaching exam in the country. Central Teaching Eligibility Test (CTET) is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher. The exam is conducted into 2 papers: Paper 1 for class 1-5 and Paper 2 for class 6-8. Any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers. The new the edition of Study Guide 'Success Master CTET Mathematics and Science Paper - II' has been prepared completely on the latest exam pattern. The book has been divided into 5 key sections and further divided into chapters providing the focused study material. After covering theoretical part this book also concentrates on the practice part. It provides 'Previous Years' Solved Paper, 2 practice sets and more than 3000 MCQs for thorough practice. Ample numbers of questions have been given which are covered in a Chapterwise manner that allows candidates to understand the trend of the questions as well as the exam. This book will prove to be highly useful for the CTET Paper 2 exam as it will help in achieving the good rank in the exam. The international nature of the sport industry presents many management challenges and opportunities for sport organisations. This book brings together cutting-edge research from leading sport management scholars around the world, surveying a wide range of topics and issues facing the sport industry today. It represents an essential platform for the international exchange of ideas, best practice and research in sport management studies. The globalisation of the sport industry has brought increased complexity to organisations' operations in terms of regulation, competition and multiculturalism. Drawing on a wealth of original research from fifteen countries, this book addresses a variety of global, regional, national and community issues that are central to successful sport management. Combining both qualitative and quantitative studies, it explores key themes, such as managing resources and organisational change, marketing and promotion, law and regulation, sport-for-development and research protocols. Global Sport Management Studies: Contemporary issues and inquiries is essential reading for all students and scholars of sport management, sport business and sport marketing, as well as for any professional working in the sport and leisure industries.

At Copenhagen in December 2009, the international community agreed to limit global warming to below two degrees Celsius to avoid the worst impacts of human-induced climate change. However climate scientists agree that current national emissions targets collectively will still not achieve this goal. Instead, the 'ambition gap' between climate science and climate policy is likely to lead to average global warming of around four degrees Celsius by or before 2100. If a 'Four Degree World' is the de facto goal of policy, we urgently need to understand what this world might look like. Four Degrees of Global Warming: Australia in a Hot World outlines the expected consequences of this world for Australia and its region. Its contributors include many of Australia's most eminent and internationally recognized climate scientists, climate policy makers and policy analysts. They provide an accessible, detailed, dramatic, and disturbing examination of the likely impacts of a Four Degree World on Australia's social, economic and ecological systems. The book offers policy makers, politicians, students, and anyone interested climate change, access to the most recent research on potential Australian impacts of global warming, and possible responses.
