How is it possible that both university graduates and unfilled job openings are both at record-breaking highs? Our world has changed. New and emerging occupations in every industry now require a combination of academic knowledge and technical ability. With rising education costs, mounting student debt, fierce competition for jobs, and the oversaturation of some academic majors in the workforce, we need to once again guide students towards personality-aligned careers and not just into college. Extensively researched, (Re)Defining the Goal deconstructs the prevalent "one-size-fits-all" education agenda. The author provides a fresh perspective, replicable strategies, and outlines six proven steps to help students secure a competitive advantage in the new economy. Gain a new paradigm and the right resources to help students avoid the pitfalls of unemployment, or underemployment, after graduation.

This book follows four emergent bilingual students in an English-medium pre-kindergarten in the US as they navigate the social and linguistic demands of school. It illustrates how students' differing classroom social positions shaped their participation in interaction and, in turn, their English language learning across a school year. With a unique focus on both processes and outcomes, the book highlights language strategies that are overlooked if the focus is solely on one language or on group participation, and it emphasizes the importance of assessment choice in shaping which learners appear to be successful. It is a powerful argument for recognising the translingual and multimodal abilities of learners, even in education which is officially English-medium and monolingual.

Life is just like walking through the rain—whether you dance through it (and have fun) or just try to avoid the puddles—you still get wet. Your life has a God-authored plan that can be exciting or can be drudgery—it all depends on how you choose to see each circumstance in your day. Each day, you can be surrounded by circumstances that test who you say you are. Those are circumstances that test your character. Circumstances like financial hardship, failed relationships, unexpected opportunities, unplanned success, or a blow to your self-esteem. Circumstances as trivial as an argument with your spouse, or as difficult as an argument with your spouse. You might think that God has deserted you when you have difficult circumstances in life, but you can find that He is closer than ever before. Re-Defining Success: Finding New Hope lets you know that you aren't the only one who has fouled up in some aspect of life and that you can come out of the situation that you are in stronger and smarter than you were yesterday. Instead of wondering about your future, take this opportunity to step out in faith and begin to learn God's plan for you. As you make a new start in your life, you have the chance to make changes in the person you are and to live in the plan He has for you. Re-Defining Success: Finding New Hope can help you see a larger picture for your life and be encouraged that these circumstances are life-challenges which have a reason.

A journalist and activist who was profiled in a 2011 Marie Claire feature outlines bold perspectives on the realities of being young, multi-racial, economically challenged and transgender in today's America, recounting her disadvantaged youth and decision to undergo gender reassignment surgery at the age of 18 before pursuing a career and falling in love.

How can grasshoppers help parents and feeding professionals teach anxious eaters about new foods? Marsha Dunn Klein, an internationally-known feeding therapist, provides the answer in this book—highlighting that most anxious eaters do not enjoy the sensations and variability of new foods. In seeking to help them, she asks what you'd need to do to help yourself try a worrisome new food, such as a grasshopper. Drawing on her own experience trying grasshoppers while learning Spanish in Mexico, she personalizes the struggle of children to find new food enjoyment, providing a goldmine of practical, proven, and compassionate strategies for parents and professionals who work with anxious eaters. Learn how to: • find peace and enjoyment during mealtimes; • find ways to help anxious eaters fearlessly try new foods; • navigate the sensory variations in food smells, tastes, textures looks, sounds; and • help anxious eaters (and their parents) develop a more positive relationship with food. Because parents are absolutely central to mealtime success, the author incorporates parent insights throughout the book. Using encouragement, novelty, and fun, she invites everyone back to the table with a sensitive and pressure-free approach.
