The purpose of this book is to define the process and protocols of the TASASS™ score. It also serves as the textbook for the USCGA™ TASASS™ certification course. It was written as a manual for students, entrepreneurs, finance professionals, advisors, and consultants. It defines the types of capital available and documentation requirements to achieve “ success ” in the capital marketplace. "Success" is defined as a trifecta of: 1) the enterprise acquiring capital; 2) the business becoming successful and 3) the capital source(s) receiving a positive outcome. Business Capital 101 provides clarity in an otherwise complicated environment of gaining access to capital for qualified enterprises. Our mission is to provide a compliant, professional, time-sensitive, cost-conscious, and realistic approach to the business finance process. We accomplish this mission by the implementation of a due diligence process known as the TASASS™ score. The TASASS™ score was developed as a result of a study of more than 300 enterprises engaged by me since 2008 wherein, I was able to determine the more than 300 common attributes amongst successful and failed ventures. The TASASS™ score is a combination of a Transaction Analysis™ (TA), a Situation Analysis™ (SA) implemented in a Software (S) that results in a Score (S). The TASASS™ score is a standardized objective due diligence process that serves capital markets during the enterprise vetting phase of capitalization. The software was created based on a 10-year study of 300 applicants. The goal of the proprietary Software as a Service (SaaS) is to identify opportunities that achieve a TASASS™ score in excess of 92.5%, known as “ TASASS Prime™. ” TASASS™ is an acronym for: Transaction Analysis Situation Analysis Scoring Software™. The TASASS™ score was developed by Tony Drexel Smith through the financial and human capital resources of: TASASS, Inc, The Association of Blue Moon Advisors, Blue Moon Advisors, Inc., Blue Moon Consortium, Inc., US Capital Global, SUMATICI, Inc., and TD Smith & Associates. Enterprises that have raised capital successfully have the following commonalities: they sought the right type of capital for their stage of development and ability to repay; they created documentation that speaks to the correct capital; and

they earned a minimum of 925 out of the 1,000 points possible in our TASASS™ score. Tony Drexel Smith Dr. Roberta Pellant

Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo, impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. Jeffrey Busgang is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups-one went public, the other was acquired. Now he draws on his experience and unique perspective on the "other side" as a venture capitalist helping entrepreneurs bring their dreams to fruition. Busgang offers detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, Mastering the VC Game will prove invaluable for entrepreneurs seeking capital and successful partnerships.
